

Award-Winning TORLYS Uniclic[®] Cork

TORLYS Uniclic[®] Cork wins Readers Choice Award for “Best New Production Introduction”

Coverings magazine asked its readers – architects, designers and dealers – to review and rank new flooring products launched in 2002. The results were published in the April 2003 issue. And the *Coverings* Readers Choice Award went to TORLYS Uniclic[®] Cork, launched in May 2002.

Here’s why TORLYS Uniclic[®] Cork received special recognition from the floor covering industry:

- Easy to install. Uniclic[®] joint system ensures tight-fitting tiles and planks. Clicks together without glue over existing wood, ceramic or concrete
- Easy to lift and reuse. Just unclick and move to another room; can also be recycled in our Habitat for Humanity ReStore program
- Environmentally friendly. Made from natural products. Cork is the bark of the Cork Oak tree. It is carefully and meticulously harvested by hand, and not until the tree has matured enough – about 25 years. The bark can be stripped every nine to 14 years, and trees can survive for decades.
- Health friendly. TORLYS Uniclic[®] Cork floors are hypoallergenic.
- Easy decorating with style and design. Simply select the rich textures and colours that enhance your décor. Available in a spectacular portfolio of colours.

The Simple, Natural, Soothing Benefits of TORLYS Uniclic[®] Cork

Cork has been used for floors for over 100 years, and is one of the most versatile, attractive flooring materials available today. Its natural, random appearance creates an elegant look that

can enhance virtually any room style and décor. Cork is perfect for kitchens and family rooms. It's natural, simple and soothing.

- Random appearance creates elegant look
- Enhances virtually any room style and décor
- Reduces noise
- Impact resistant
- Insulates against heat and cold
- Comfortable under foot

What Experts say about TORLYS Uniclic® Cork

"I've really been thrilled with my TORLYS Cork floor. It has surpassed my expectations. It's good for traffic, it's good for comfort, it's warm, it's not cold under the feet and it has added personality to the room that I know I wouldn't have achieved from wall-to-wall broadloom or a colder ceramic floor."

Cheryl Grant, design and trends analyst

"What's great about cork is heat sensitivity or cold sensitivity; which means it's a good insulator between floors. The other thing is that cork is non-allergenic. It's a great product for a kid's room or a baby's room. It is a soft surface as well; a little bit softer tone than wood would be, but what's nice about cork is that it looks natural."
