Floors For A Better World

Cork is recognized worldwide as a floor with unsurpassed environmental advantages.

TORLYS entire cork collection is FSC® (Forest Stewardship Council®) certified, ensuring your floor meets strict environmental standards, including wood and cork sourced from responsibly managed forests.

LEED®

TORLYS smart Floors can assist in acquiring LEED certification for most building projects. Please visit www.torlys.com/builder/leed-guide.

TORLYS is a member of the Canada Green Building Council whose mission is to lead and accelerate the transformation to high-performing, healthy green building, homes and communities throughout Canada.

CorkWood™ Elite Flooring

LEED®

The Eco-Friendly Choice.

TORLYS is the first to offer an entire cork collection that is FSC® (Forest Stewardship Council®) Certified. The recognition is achieved by passing the rigorous standards established by the FSC®, ensuring the wood and cork used in manufacturing comes from responsibly managed forests. TORLYS even encourages (and warranties) re-purposing cork smart floors in another room or home, making it the ultimate eco-friendly flooring choice. TORLYS smart floors contribute to LEED® (Leadership in Energy and Environmental Design) in Materials and Resources, Indoor Environmental Quality and Innovation and Design Process.

Clean and Comfortable

At TORLYS, we are dedicated to providing your family with a comfortable and hygienic flooring solution. Our products meet California Section 01350 requirements, one of the most stringent indoor air quality standards in the world. Being composed of millions of tiny air pockets, cork is a great insulator and is quiet and comfortable underfoot. This feature helps to reduce heat loss in rooms, maintaining a pleasant indoor air temperature. The CorkPlus™ attached underlay, made from recycled cork, adds additional warmth and sound insulation. It is even infused with Microban® antimicrobial product protection to inhibit the growth of mould and mildew.

Durability Built-In

All TORLYS cork floors are created with quality in mind. They are made with a precisely engineered high-density wood smart core, which is more dent resistant than other floors. The patented Uniclic® joint technology used in all cork smart floor construction resists gapping, keeping your floors as beautiful as the day they were installed for years to come. The extremely durable TORLYS smart finish has been integrated into every TORLYS cork floor. This innovative finish is the strongest, most durable and most environmentally friendly water-based urethane finish we have ever created.
